Full Stack Developer

As a musician-turned-tech professional, I bring a unique perspective and skill set to the industry. With a strong background in music performance, I have developed a keen attention to detail, a creative problem-solving approach, and a dedication to continuous learning and growth. I am proficient in multiple programming languages and have a strong understanding of agile methodologies and software development best practices. I am passionate about using technology to solve real-world problems and am excited to continue to learn and grow in this dynamic field.
